

PRODUCT OVERVIEW

QUICKLINK

Quicklink Product Overview

Automatic Alignment System for fixed wireless links.

QuickLink Automatically maximizes the link throughput, reduces installation time and eliminates the need for highly skilled fixed wireless link installers.

Advanced System Automation

With the QuickLink being a one-touch alignment system, utilizing a smart phone or any wi-fi enabled device, setting up the QuickLink is fast and easy for the user. Select the radio, select master/slave, hit the start button and in minutes the system will find and optimize the link.

Rapid Fixed Link Provisioning

Utilizing real-time information provided by the radio along with proprietary search algorithms, the QuickLink rapidly finds, optimizes and peaks the link to the highest throughput possible.

Radio Compatibility

All BATS Products are compatible and integrated with over 50+ radios.

Reduced Installation Cost

With BATS innovative systems, we deliver rapid wireless backhaul without the need for experience RF engineers. Any operator with experience climbing towers or installing antennas can deliver ultra-precise network links in minutes.

Reusability

Utilizing detachable actuators and hand-held battery-operated control system, the QuickLink can be used repeatedly, providing a cost effective automatic solution for fixed wireless installations.

PRODUCT SPECIFICATIONS

QUICKLINK

Specifications

Quicklink - Rapid, Reusable Antenna Aiming System for Fixed Links

BRACKET WEIGHT	Standard: 21.2 lbs (27.9 lbs w/ actuators)
PAN/TILT-AXIS RANGE	$\pm 15^\circ$ (PAN/TILT)
ACCURACY	0.02°
MOUNTING	1.5" to 4.5" Pole
MATERIALS	6061-T6 Aluminum Alloy
FINISH	Black Hard Anodized Finish

Quicklink Antenna Control Unit

PHYSICAL DIMENSIONS	7.5" (L) x 8.5" (W) x 2.5" (H)
WEIGHT	~1 lbs. / .45 kg
ENVIRONMENTAL	IP-65
POWER	Rechargeable & Removable Batteries
CONFIGURATION	WIFI - Smart Phone, Tablet, Laptop
CONTROLS	Two Button Touchpad (On/Off) (Align/Stop)

Control Unit
